

PLAINS COMMUNITY HEALTH
Established Patient Follow-up

Patient: Gutierrez, Ana
DOB: 1953-07-18 MRN: PCH-2018-1129
Date of Service: 09/03/2024
Rendering Provider: Ravi Anand, MD
Encounter Type: Established patient follow-up
Plus: Venipuncture (CPT 36415) + Comprehensive metabolic panel (CPT 80053)
Claim Control Number: MOL-BUNDLE-9993

CHIEF COMPLAINT

3-month diabetes follow-up; routine labs ordered.

HPI

71-year-old female with longstanding type 2 diabetes mellitus. Reports adherence to metformin and empagliflozin. Home glucose log shows fasting 130-160. No hypoglycemic episodes. Reports occasional foot tingling – bilateral, intermittent. Denies polyuria, polydipsia, or recent weight change.

EXAM / VITALS

BP 138/82 HR 76 BMI 30.1
Foot exam: intact monofilament 10/10 bilaterally; no ulcers; pulses 2+. Otherwise unremarkable.

DIAGNOSTICS PERFORMED TODAY

- CPT 36415 – Venipuncture for blood collection. Performed at point of care. Sample sent to outpatient lab.
- CPT 80053 – Comprehensive metabolic panel ordered (results pending).
- A1C, lipid panel, microalbumin/creatinine ratio ordered separately.

ASSESSMENT/PLAN

1. Type 2 diabetes mellitus with neuropathy (E11.40) – suspected given paresthesias. Continue current regimen pending A1C.
2. Stage 1 hypertension (I10) – controlled. Continue lisinopril 20 mg. RTC 3 months.

E/M LEVEL: 99213 (separate component) – established patient, low MDM.

BILLING NOTE (re: CO-97 bundled denial for 36415 + 80053):

The 36415 venipuncture and 80053 CMP are distinct, non-overlapping services. Per Molina policy LAB-04 §2.3, in-office venipuncture for specimens not analyzed on-site is separately billable when performed in conjunction with comprehensive lab panels. Modifier 59 added on resubmission to denote distinct service.
