Established Patient Visit

Patient: Allen, Keisha
DOB: 1989-12-14 MRN: PCH-2024-3309
Date of Service: 08/30/2024
Rendering Provider: Talia Verma, MD
Encounter Type: Established patient visit (CPT 99213)
Claim Control Number: MOL-DUP-9991

CHIEF COMPLAINT

Sinus pressure and congestion, 8 days.

HPI

35-year-old female with 8 days of bilateral maxillary pressure, yellow-green nasal discharge, and worsening fatigue. No dental pain. Afebrile.

EXAM / VITALS

T 98.6 HR 72 BP 122/78
ENT: Right maxillary tenderness; nasal mucosa erythematous with purulent discharge.

ASSESSMENT/PLAN

1. Acute bacterial sinusitis (J32.0) – duration > 7 days plus purulence and unilateral tenderness. Augmentin 875/125 BID x 7 d.
 2. Symptomatic management: saline irrigation, NSAIDs prn.
- RTC 10 days if not resolving.

E/M LEVEL: 99213 – established patient, low-complexity MDM.

BILLING NOTE (re: CO-18 duplicate denial):

Encounter on 08/30/2024 is a SEPARATE office visit, distinct from the prior 06/04/2024 sinusitis visit (claim 88112). Different episode of care, > 90 days apart, different antibiotic course. Per Molina policy PR-12 §4, repeat sinusitis episodes more than 30 days apart are not considered duplicate services. Requesting reconsideration.
