Encounter Type: Established patient follow-up (15 min)
Rendering Provider: Anjali Mehta, MD

CHIEF COMPLAINT

Routine follow-up for type 2 diabetes mellitus and essential hypertension.

HPI

71-year-old retired schoolteacher presents for scheduled 3-month diabetes/HTN follow-up. Reports adherence to metformin 1000 mg BID and lisinopril 20 mg daily. Home glucose log shows fasting values 110-140; post-prandial occasionally 180s. BP at home averages 132/78. Denies hypoglycemia, chest pain, dyspnea, polyuria. No new complaints today.

MEDICATIONS

- Metformin 1000 mg PO BID
- Lisinopril 20 mg PO daily
- Atorvastatin 40 mg PO QHS
- ASA 81 mg PO daily

VITALS

BP 134/80 HR 72 RR 14 SpO2 98% RA Wt 168 lb BMI 28.4

EXAM

Gen: Well-appearing, NAD. CV: RRR, no murmur. Lungs: CTAB.
Abd: soft, NT/ND. Ext: no edema. Skin: feet inspected – no ulcers, intact monofilament sensation x10 points bilaterally.

ASSESSMENT/PLAN

1. Type 2 diabetes mellitus (E11.9) – improved control. A1C in 11/2023 = 6.9. Continue current regimen. Repeat A1C 4/2024.
2. Essential hypertension (I10) – controlled on lisinopril. Continue.
3. Hyperlipidemia (E78.5) – LDL 88 on atorvastatin. Continue.
4. Routine health maintenance – flu vaccine offered & administered today (separate claim).

E/M LEVEL: 99213 – established patient, low-complexity MDM, two stable chronic conditions with medication management.

Patient verbalized understanding. Follow-up 3 months.
